

Wild Fire

WOOD CHIPPING KNIVES

The next generation of wood chippers "WILDFIRE" technology has been developed by an Australian company to meet the demanding and unique hardwood timbers in the Australian market.

WH Blakeley have invested in new state of the art CNC machines and heat treatment processes to produce a world class product.

The new blade technology has been developed and refined to a premium product by working with local chipper manufacturers.

The steel used in the manufacturing of the "WILDFIRE" chippers is of a specific grade sourced from leading European steel mills.

The "WILDFIRE" chippers offer the following

- Superior longevity and performance
- Outperform other chippers by a factor of 3 to 1
- Designed for Australian hardwoods
- Manufactured from specific chipper grade steel
- Offer a wide range of stock for all commonly used chippers in the Australian market
- Custom made orders to suit special machines
